Summary

Computer Science graduate (CGPA: 8.80/10) building production-oriented **Generative AI and agentic systems** with Python, LLM agents, **MCP**, tool calling, APIs, retrieval, and containerized infrastructure. Built and deployed multi-agent decision workflows, MCP servers, and AI-driven DevOps automation with deterministic validation, external integrations, persistence, and human-controlled execution.

Technical Skills

Programming/Backend: Python, SQL, FastAPI, Pydantic, REST APIs, Structured Outputs

GenAI/Agents: LLM Agents, Agent Orchestration, RAG, LangGraph, MCP, FastMCP, Tool/Function Calling, Embeddings, Vector Search, LLM/Agent Evaluation

Databases: PostgreSQL, pgvector, MongoDB, Redis, SQLite

Infra/Tools: Docker, Docker Compose, CI/CD, Git/GitHub, DigitalOcean, Cloudflare, AWS S3

ML/Data: pandas, NumPy, scikit-learn

Experience

Employability.life – Federation University Australia [Certificate]

Sep 2024 – Nov 2024

Experiential Learner – RPA Developer & Business Analyst

Kolkata, India

- Built UiPath automation workflows that cut manual data-processing time by **10+ hours/week** and error rate by **70%**; authored PDDs and coordinated requirements and sign-off across Agile sprints.

Projects

ARIS – Technology Adoption Intelligence [Live] [GitHub]

2026

Python, LLM Agents, NVIDIA NIM, Heym/FastAPI, PostgreSQL, Docker, GitHub/OSV/Tavily APIs

- Built a **7-branch parallel agent DAG** that evaluates software tools across six weighted dimensions using signals from GitHub, OSV, Tavily, and repository analysis.
- Built custom Python execution and MCP payload compression to eliminate context-overflow failures, while enforcing **deterministic scoring separate from LLM-generated narratives** so numeric verdicts remain reproducible and auditable.
- Deployed a Cloudflare Pages frontend with a Dockerized Heym/FastAPI/PostgreSQL backend on DigitalOcean behind a permanent Cloudflare Tunnel.

MCP-Driven DevOps Orchestration Hub [GitHub] [Demo]

2025 – Present

Node.js, MongoDB, Redis, Docker, OpenClaw, MCP, CI/CD

- Built an AI-driven DevOps system for natural-language CI/CD triggering, MCP skill routing, execution status/log handling, and agent-generated failure summaries.
- Containerized and sandboxed the OpenClaw agent runtime with Docker and implemented human-controlled execution boundaries for safer infrastructure automation.

Study Buddy – MCP Learning Server [GitHub]

2026

Python, FastMCP/MCP SDK, SQLite, Pydantic, uv

- Built a Python MCP server exposing **13 tools, 3 resources, and 4 prompts** for structured access to PDF, DOCX, image-based study material, and past examination papers.
- Implemented SQLite-backed mastery tracking, fuzzy topic matching, Pydantic-typed inputs, path-traversal-safe file access, and PYQ-analysis tools for verbatim retrieval and structurally matched practice generation.

GitHub Ranker – Remote MCP Server [GitHub]

2026

Python, FastMCP, GitHub API, httpx, Render

- Built and remotely deployed an MCP server that ranks software-engineering candidates against job requirements using structured tools and live GitHub API data.

Education

Sister Nivedita University

Jun 2022 – Jun 2026

B.Tech in Computer Science and Engineering – CGPA: **8.80/10**

Achievements

2nd Place – BRICS-FS-36 Data Analysis & Visualization [Certificate]

Dec 2024

Won 2nd Prize in the international final held in China and hosted by WorldSkills Russia and partner organizations.

EL Excellence Award – Top 50 Learner [Award] [Citation]

Feb 2026

Selected among the program's Top 50 Learners; citation co-signed by the partner organizations' COO and CEO.

Certifications

Applied ML in Python [Certificate] – University of Michigan **MCP Fractal** [Certificate] – Coursera

SQL [Certificate] – University of Colorado Boulder
