Summary

Agentic AI engineer (B.Tech CSE 2026, CGPA **8.80/10**) shipping guarded LLM agents: **typed tool calling under code-enforced budgets, grounded outputs with deterministic fallbacks, and adversarial evals in CI**.

Technical Skills

Agents/LLMs: Tool calling, multi-agent orchestration, structured outputs, guardrails, prompt-injection hardening, human-in-the-loop, model fallback, LangGraph, LangChain, NVIDIA NOOA, MCP (FastMCP), Heym, RAG; OpenRouter, NVIDIA NIM, Claude, Gemini
Evals/Observability: Offline & adversarial evals, LangSmith, agent tracing, pytest, Playwright, Vitest
Backend: Python, FastAPI, Pydantic, SQLAlchemy, Alembic, asyncio, REST APIs, SQL, JavaScript, TypeScript, React
Data/Infra: PostgreSQL, MySQL, SQLite, MongoDB, Docker, GitHub Actions, Cloudflare, Render, DigitalOcean, AWS S3

Projects

TraceIntel - On-Chain Exposure Intelligence Agent [Live] [Demo] [GitHub] **2026**
Python, FastAPI, NVIDIA NOOA, PostgreSQL, React/TypeScript, Docker, GitHub Actions, Cloudflare, Render

- Built and deployed a read-only analyzer for **Ethereum and Monad** that decodes every ERC-20 approval in a transaction and compares each permission then vs. now (allowance, balance, spender code) at a reorg-safe pinned block.
- Designed a **planner–reporter agent** on NVIDIA NOOA: the planner calls **3 typed read-only tools** under a code-enforced budget; the reporter cites only evidence-backed claims, with one repair before a **deterministic baseline** fallback.
- Built **24 offline evals that run in CI** with no network or model, including 8 labelled agent scenarios and **5 adversarial cases** that script the model to misbehave (out-of-scope tool calls, invented claims, prompt injection via token names).
- Hardened for production with bounded async RPC (backoff, method allowlist), lease-based restart-safe jobs, rate limits and daily LLM cost budgets, and a full agent trace per report; ~95 pytest/Vitest/Playwright tests run on SQLite and PostgreSQL.

ARIS - Technology Adoption Intelligence [Live] [Demo] [GitHub] **2026**
Python, Heym (FastAPI), NVIDIA NIM, MCP, Playwright, PostgreSQL, Docker, Cloudflare Pages/Tunnel, DigitalOcean

- Built a **104-node workflow** that turns a library name and the user's repo into an emailed adoption brief: **7 parallel branches** gather evidence from GitHub, OSV, PyPI/npm, Stack Exchange, and Tavily (via MCP), scored on 6 dimensions.
- Limited LLMs (gpt-oss-120b, JSON mode) to extraction and narrative; **18 Python nodes (~1.8k lines)** compute every score, a security veto on unpatched CVEs, and a confidence score that drops when a branch fails.
- Built a PythonExec node for a Heym fork (7 tests, proposed upstream), self-hosted in Docker on DigitalOcean.

Study Buddy - MCP Learning Server [GitHub] **2026**
Python, MCP SDK/FastMCP, SQLite, Pydantic, uv

- Built a stdio MCP server for Claude Desktop exposing **13 tools, 3 resources, and 4 prompts** so the model can teach and quiz from local notes, PDFs, DOCX files, images, and past exam papers.
- Tracks mastery in SQLite with fuzzy topic matching; Pydantic-validated inputs and path-traversal protection.

More agent work: 3 more MCP servers (one remote, on Render), a human-in-the-loop reply drafter with multi-model fallback, and an OpenClaw Telegram agent for a team DevOps tool [GitHub] [Demo].

Experience

Employability.life - Federation University Australia [Certificate] [Recommendation] **Sep 2024 - Nov 2024**
Experiential Learner - RPA Developer & Business Analyst *Kolkata, India*

- Built UiPath automations that cut manual data processing by **10+ hours/week** and errors by **70%**; wrote process design documents and drove requirements, testing, and sign-off across Agile sprints.

Education

Sister Nivedita University **Jun 2022 - Jun 2026**
Bachelor of Technology in Computer Science and Engineering; CGPA: **8.80/10**

Achievements

2nd Place - BRICS-FS-36 Data Analysis & Visualization (international final, China) [Certificate] Dec 2024
EL Excellence Award - Top 50 Learner [Award] [Citation] Feb 2026

Certifications

Applied Machine Learning in Python [Certificate] - University of Michigan
Model Context Protocol (MCP) Mastery [Certificate] - Fractal Analytics / Coursera
SQL [Certificate] - University of Colorado Boulder
